

10,000 nurses on boards by 2020.

All boards benefit from the unique perspective of nurses to achieve the goals of improved health and efficient and effective health care systems at the local, state and national levels. Nurses bring a full set of skills not found in other professions and play a crucial role in developing high-quality systems of care that offer better outcomes and increased satisfaction for people, families and communities. It's for these reasons that we are working to help the profession "leap into leadership".

Join us February 29 - March 4 and have your efforts in board leadership be recognized and counted.
