Developing Interprofessional Education and Practice in Oral Health Teaching Strategy

Overview of Teaching Strategy

Oral Health promotion for older adults requires interprofessional communication, collaboration, and teamwork.

Learning Objectives

Students will:
- Students will develop awareness of interprofessional competencies.
- Students will practice interprofessional communication and collaboration.

Getting Started

This teaching strategy will incorporate the ACE.S Essential Nursing Actions: Assess Function and Expectations, Coordinate and Manage Care, and Make Situational Decisions. The strategy utilizes the Smiles for Life curriculum from the Society of Teachers of Family Medicine. Access the Smiles for Life Curriculum at [http://www.smilesforlifeoralhealth.org](http://www.smilesforlifeoralhealth.org)

Become familiar with Oral Health Patient FACTS. These pamphlets from the American College of Physicians & the Oral Health Nursing Education and Practice Program are designed to improve patients’ oral health literacy by providing user-friendly, easy-to-understand information about how oral health and overall health are connected. Download guides (which are available in English and Spanish) at [http://ohnep.org/news/oral-health-patient-facts](http://ohnep.org/news/oral-health-patient-facts)

Materials

The following teaching strategies are designed to be completed by interprofessional groups: NP = nurse practitioner, RD = registered dietician, DH = dental hygienist, SW = social worker.

Interactive Games

Go to Smiles for Life website ([http://www.smilesforlifeoralhealth.org](http://www.smilesforlifeoralhealth.org)) and choose interactive games/test your knowledge on one Module (1, 7, or 8). This resource was created to be used by an individual or in a classroom setting as pretest or to review knowledge following course completion.
Students will form interprofessional teams (NP, RD, DH, and SW) with student from each profession on each team. Each team will work together to come up with one answer to each question. The team with the most correct answers wins.

Develop Interprofessional Oral Health Education “Speed Dating” Presentation for Senior Center

Student teams (NP, RD, DH, SW) will be at separate tables at the senior center. Teams will choose one of the following Patient Oral Health Facts (http://ohnep.org/news/oral-health-patient-facts) and engage seniors in a health literacy discussion about their oral health. Each student group will present one topic. Seniors, divided into groups, will spend 10 minutes at each table presentation and discussion.

Oral Health Overview (Spanish version)
Oral Health and Diabetes (Spanish version)
Oral Health and Older Adults (Spanish version)
Oral Health and HPV (Spanish version)

Develop Nutrition Education Program

Following health literacy principles, students (RN, RD, DH) will develop an evidence-based nutrition and oral health education program for older adults in collaboration with dental hygiene students and nutrition students. This program will be presented in the senior center.
