

1. Technology and Learning

- Do you provide a number of different avenues for students to access and learn necessary content (i.e., use of digital books, specialized software, websites, etc.)?
- Do you provide an opportunity for students to demonstrate their learning in different ways (i.e., online concept mapping, online collaboration platforms, etc.)?
- Do you provide varied ways for students to engage in the coursework to enhance their interest and participation in the learning process (i.e., virtual learning, gaming, mobile data collection, etc.)?

2. Technology and Teaching

- Do you provide professional development opportunities for your educators to ensure that they are capable of selecting, evaluating, and using appropriate technologies (i.e., [Common Core state standards](#)) to enhance student learning and achievement of your program learning outcomes?
- Do you assure that educators understand the privacy and security issues that accompany technology enhanced learning strategies?
- Do you provide opportunities for educators to collaborate outside of your institution to enhance learning opportunities for all students?

3. Technology and Leadership

- Do you have a [vision](#) for the use of technology to enhance achievement of student learning outcomes (i.e., engage stakeholders in the conversation –students, educators, technology experts, etc.)?
- Do you have connections to educators outside your institution to engage a community of practice that can serve to share practices, identify research, and evidence for best teaching practices?

4. Technology and Assessment

- Do you have assessment strategies in place (e.g., learning dashboards, response systems, communication strategies) to ensure prompt and reliable feedback to learners?

- Do you have valid and reliable measures to assess student learning, faculty expertise, and program effectiveness?
- Do faculty use evidence generated from nursing education research and best practice guidelines (i.e., NCSBN guidelines) to engage learners and assess learning outcomes?

5. Technology and Infrastructure

- Do you provide adequate means for students to engage technology in the classroom, campus, and home (wireless, access points, etc.)?
- Do you utilize openly licensed educational resources (...“resources that can be used, modified, and shared without paying licensing fees or requesting permission” (U.S. DOE, 2016, p.73)
