

The What and Why of Technology Use by Today's Nursing Students

A highly educated nursing workforce is critical to meeting the nation's healthcare needs and delivering safe patient care. Faculty and students are increasingly turning to technology to provide solutions to the reduction in available clinical sites, to help increase NCLEX® pass rates, to provide tools for struggling students, to gain exposure to tools used in practice (EHRs), and to increase the use of course content that enhances clinical reasoning and success.

What students had to say about their technology use*

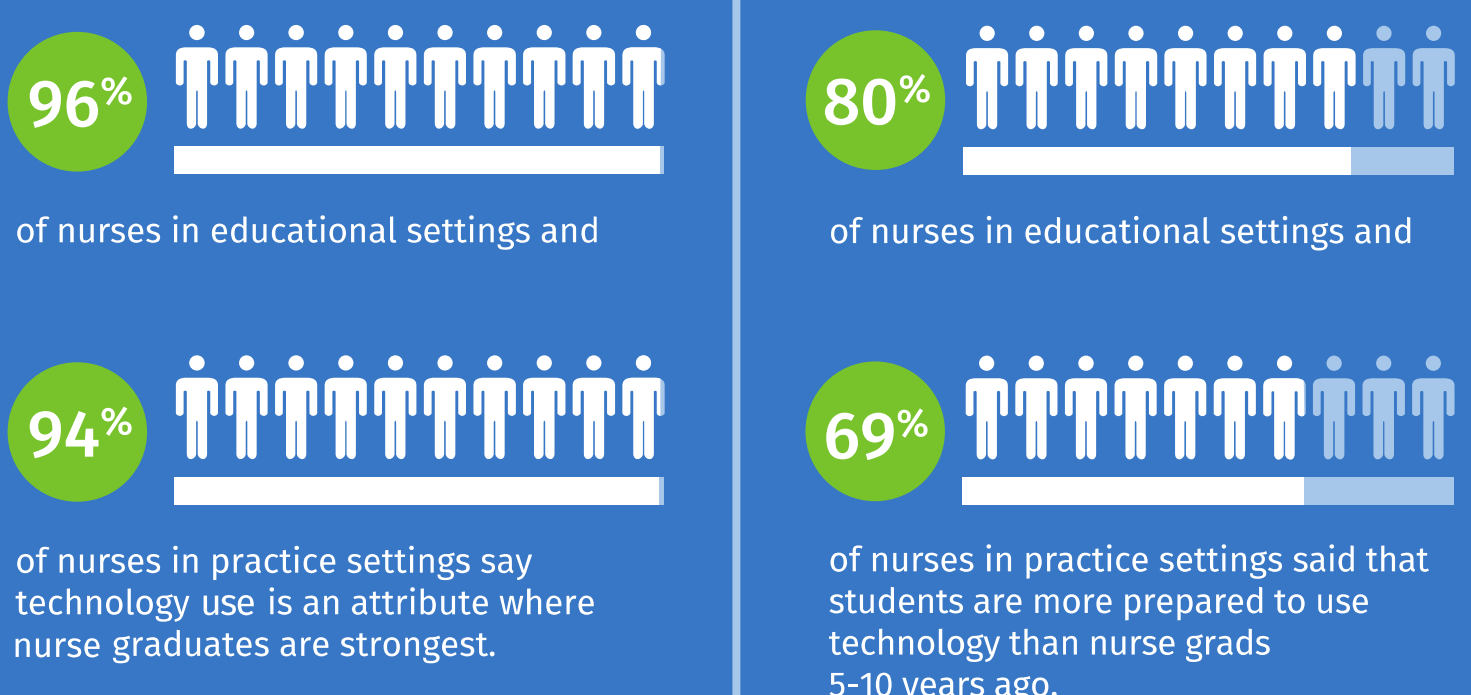

When faculty were asked to indicate top reasons for adopting technology, these were the top student-focused reasons: **

Over the next 5 years, virtual reality is the new technology that should have the greatest increase in adoption.

What nurses in practice and nurses in educational settings said about the level of preparedness and knowledge aptitude of nurse graduates entering practice***
